**These appliances are only for
professional use by a qualified person**

GENERAL SAFETY ADVICE

We would have prepared/tested and checked these items prior to you receiving them to ensure safe and full working condition.

Electrical equipment is required to be properly maintained so as to prevent danger to the user.

It is our policy to inspect every electrical appliance before re-hire. This is done by an electrically qualified person trained in PAT Testing. This combined inspection and test includes:

- Visual Inspection
- Earth continuity tests (for Class I equipment)
- Insulation resistance testing (which can be replaced with protective conductor/touch current measurement)
- Flash Testing (or Hi-Pot testing)
- No load (run) test
- Polarity check (extension or detachable lead sets only), and
- Functional tests

The results of each test are recorded and are kept as records for future inspection.

OPERATING INSTRUCTIONS

Depending on which model oven you have hired - not all ovens will have all features listed - Please book an appointment with us before hire and we will show you how each oven operates.

Turning on -

Buffalo/Belling models - turn temperature knob to desired temperature, oven will come on automatically, turn temperature knob to '0' to switch oven off.

Other models

Press to switch power on or off (Switch illuminates when power is on)

BAKING—Set thermostat to desired cooking temperature. The heating pilot light will illuminate whenever the elements are cycled on to maintain set temperature.

Caution—Do not leave the oven switched on with the door open for longer than is necessary or excess heat from the element may cause damage to the oven or lights.

SAFE USE

The safe use of hire equipment is the sole responsibility for the hirer once the items are collected or arrive on site.

Angelo's staff are not allowed to install equipment on site, and you are not permitted to make any alterations to the appliance or its connectors in any way.

If in any doubt please ask an call us for advice

- Never use the equipment in a poorly ventilated space or near combustible materials.
- Keep all children, animals and bystanders away from the appliances whilst in operation.
- Ensure the floor of the work area is flat, free from trip hazards and non-slip.
- Keep a bucket of water nearby to treat burns.
- Use CO2 extinguisher to hand in case of and emergency.
- Wear suitable protective clothing, such as an apron, overall and hat. Use kitchen gloves for handling utensils to protect from burns.
- **Allow the appliance to cool fully before touching or cleaning.**
